

# ANTHELION

helicopters

## GET STARTED RIGHT AWAY

Chris is one of our students that we have working on his private certificate. The first hurdle to overcome in fulfilling his dream, was finding the right flight school.

“After touring Anthelion, learning about their training program and their emphasis on safety, I knew it was the right place for me. The facility is perfect for one-on-one individualized training, and having access to a flight simulator for advanced training is a huge advantage.”

Chris trains at least twice a week, and though we credit his enthusiasm for flying, when asked what he credits for his progression, Chris replied, “the lesson plans made it easy for me to meet all the necessary requirements quickly and efficiently. I can’t wait to continue onto my commercial and instrument training!”

The future looks bright for Chris. He recently finished his first solo flight. A step to completing more requirements toward his certificate. Good luck Chris, let us know if we can do anything to help you with your progress. Follow us along on his journey through our professional program.

## Can't make it down to check out our facility?

If you visit our website at [www.AnthelionHelicopters.com](http://www.AnthelionHelicopters.com), you can take a virtual tour of our facility, and even check out the helicopters that we have in our hangar.

## GET THE PICTURE

Check out Instagram, <https://www.instagram.com/anthelion.helicopters/>. Some of the photographers that we fly with are off the hook. The picture to the left was taken compliments of @\_j.Decastro and flown by Anthelion Helicopters. Not only is the coastline beautiful, but our new Robinson R44 boasts air conditioning and a state of the art Garmin 500 glass instrument panel. If you or anyone you know is interested in amazing photography, follow our instagram page and come for a ride! Don't forget to bring your camera!

## GETTING IN TOUCH

Be sure to watch out for all of the cool new things coming in the near future for Anthelion Helicopters. For any information regarding helicopter training, tours or photoflights with Anthelion Helicopters, please contact us right away.

*“... it wasn't until a friend of mine told me he went for a discovery flight in a helicopter that I finally decided to book one of my own. I went for a quick flight in an R22 helicopter and was instantly hooked! There was a freedom in it that I had never felt before and I knew that I wanted to sign up for lessons.”*

We also have financing options!
